

## Varieties Found on the GB Booklet Stamps

Original list drawn up by *Harvey J. Russell* ([harvey6@btinternet.com](mailto:harvey6@btinternet.com))

A simple **cataloging** system has been used for identifying the flaws.

First number = type (2 or 3)

First letter = value (A = ½d; b = 1d; C = 1 ½d)

Second number = Stamp location on booklet pane i.e.

1 = Upper Left stamp (first row)

2 = Upper Right stamp (first row)

3 = Lower Left stamp (second row)

4 = Lower Right stamp (second row)

Last letter = order in which variety identified

+ = Variety still to be verified as constant

E.G.: 3A2A = Booklet Type 3 stamp; ½d stamp; Upper right stamp top row; First variety identified for this stamp position.
