

# Waterlow and Sons Limited

## 1935 Silver Jubilee of King George V List of Common Design Printers and the Varieties

### Printers

Printing for the common design stamps was undertaken by three companies. Waterlow & Sons prepared the master dies of the vignette and frames. Duplicates were provided to the other two printers. This accounts for the differences in varieties seen. Perforation size for the Waterlow and Bradbury printings were 11 x 12 whereas the De la Rue perforations were 13 1/2 x 14. The De la Rue printings contained the vignette plate numbers on the bottom selvages (margins) under the fifth stamp in the bottom row. Although these were not present with the other printers the various plates have been identified. Plates have generally been listed in the order in which they have been identified Bradbury and Waterlow undertook the printing for 15 colonies each (see below), while De la Rue did the printing for 14 colonies.
